

WE ARE "VITESSE"

What is F1 in schools?

- F1 in Schools was founded in 1999 by Andrew Denford. He is credited with establishing the competition in 1999, originally named 'Jaguar F1 Team in Schools'.
- F1 in Schools is an international STEM challenge where students utilise CAD/CAM technology to manufacture their own scale Formula 1 cars, which they subsequently race using a CO₂ cartridge propulsion system.
- With a strong focus on the engineering and design elements, there's also a marketing element to F1 in Schools and compulsory collaboration.
- However, criteria for judging ranges from engineering documentation and branding to project and time management, as well as presentation professionalism, over and above the design of the car.

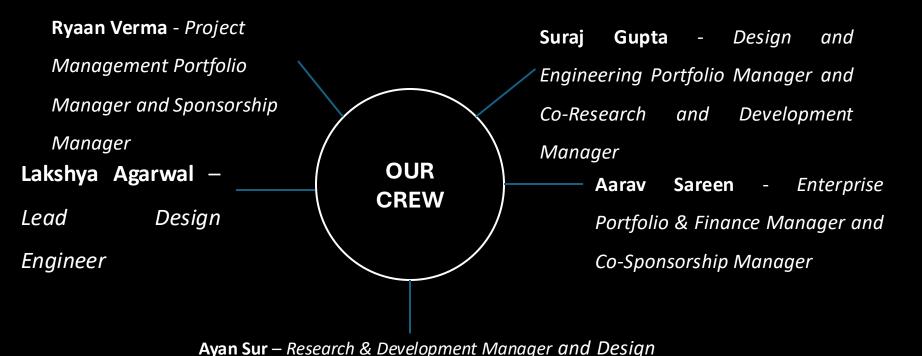

Our Team

Consultant

We are **Team Vitesse** – a passionate group of aspiring engineers, innovators and designers participating in the F1 in schools competition. We are a team of students driven by creativity, collaboration and a relentless pursuit of excellence. "Vitesse" is a French word which means "speed".

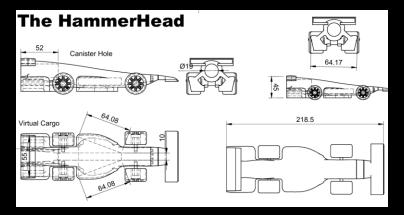

Our Car

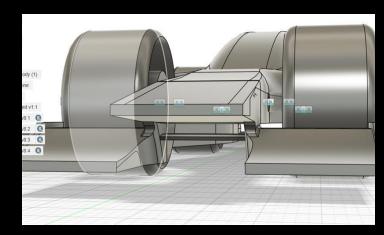

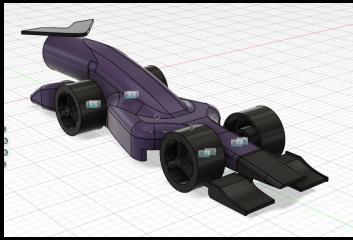

Our Old Car-The HammerHead

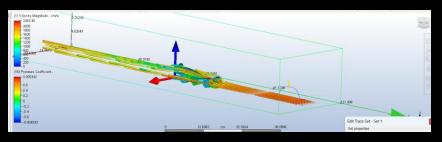

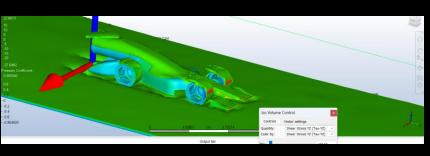

Our New Car-Hyperion

Our performance during the Regional Finals 19th April 2025, Suncity school sector 37-D

We proudly showed our hard work, innovation and teamwork at the Regional Finals of the F1 in school's competition. This event marked a major milestone in our journey

At this event:

- We competed against other teams from across the region.
- Presented our engineering, design & project management portfolios.
- Demonstrated our custom built F1 car on the racetrack.
- Showed our teamwork skills
- Got Nominations for:
 - Best Engineered Car
 - Design and Engineering
- Won the Design and Engineering award
- Got nominated for National Finals

Next Goal

Our next phase is focused on elevating every aspect of our performance — from engineering precision and car design to marketing, branding and team presentation

Key Objectives:

- Redesign and optimize our car for the best performance
- Refine our portfolio (Enterprise, Project management, Design and Engineering)
- Make Pit Display better
- Strengthen team roles
- Enhance our branding and digital presence
- Secure sponsorships to cover costs for travels, manufacturing of car, Pit Display, testing, merchandise and more

Our Sponsors & Merchandise

While designing the merchandise, we wanted to stick with our team colors. To represent our team name which means speed, we planned on making 5 lightning bolts Tshirt, 1 for each team member, but unfortunately we didn't have funds after all the expenditure

We made business cards, a standee, stickers, caps and more for our team branding. This gave a lot of exposure to all of our sponsors.

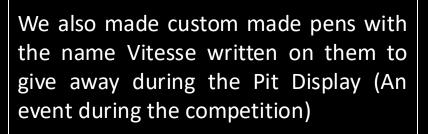

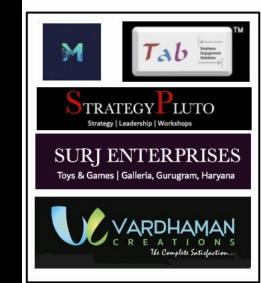

Parternships and

Sponsorships

We would like to thank our sponsors for providing us with the resources and guidance to bring our idea to life.

Funding Support Required

Participating in F1 in schools requires more than just passion — it required resources, tools and support. Your funding helps us bring our ideas to life and compete at the highest level. Your company will gain attention by our races, Pit display and more. We can help advertise your company to the world as the event would be live streamed.

Where we utilize the Funds

- Car Manufacturing and Materials: Manufacturing of car using high quality materials such as Nylon and Carbon fiber by using "Additive Manufacturing"
- Team Identity and Branding: Uniforms, team merchandise and pit display setup, Logo, graphic design and digital media
- Marketing and Portfolio Development: Professional presentational materials, Printing and Display costs
- Event Participation Costs: Travel and accommodation for National Finals; Entry fees and transport
